

Ts. AMIR FIRDAUS BIN ABDUL JAMIL

No 11A, Jalan 8A,
Ampang Jaya,
68000 Ampang,
Selangor, Malaysia.

E mail: amir.firdaus@yahoo.com
H/P No: +6 019 6650 187

INTEREST & EXPERIENCES

- Engineering Design
- Facility/Asset Management
- Facility/Asset Maintenance
- Energy Manager
- Project Management
- Power System Protection
- Low/High Voltage Technology
- Lightning Protection System

REGISTRATIONS

IEM	: 43106 (26th July 2010)
BEM	: GE55625A (21st July 2009)
MBOT	: GT20110094 (9th Nov 2020)

COURSES

LASTFIRE :	Speaker of "The Importance of Lightning Protection for Large Atmospheric Storage Tanks and Facilities"
CIDB :	EWK3 Electrical Supervisor
NIOSH :	Oil & Gas Safety Passport
PETRONAS :	Offshore Safety Passport
AAE :	Associate ASEAN Engineer member
ALLTEC US :	Grounding, Surge Suppression, Lightning Protection training.
BEM :	Forum "Globalisation Of Young Malaysian Professionals-A Future Perspective"
IEM :	Seminar On "MS IEC 62305 Series"

EDUCATION

University of Tenaga Nasional (UNITEN)

- Bachelor of Electrical Power Engineering 2007
- Diploma in Electrical Engineering 2003

BIODATA

DOB	: 10 Nov 1982
IC No	: 821110-06-5429
Gender	: Male
Height	: 167cm
Weight	: 83Kg
Blood Type	: A+

EXPERIENCES

2024 - Current

Project and Contract Manager

Kejuruteraan Desir Emas Sdn Bhd

As the **Contract Manager and Project Manager** under Kejuruteraan Desir Emas Sdn Bhd (KDESB), scope of work bridges two core pillars: **Commercial & Legal Contract Governance** and **Operational & Technical Project Execution**.

- Based on the established operational frameworks, your comprehensive scope of work is detailed below:

Contract Management & Commercial Governance

- **Prime Contract Administration:** Plan, execute, and manage the administration of all service and supply contracts—encompassing general manpower, specialized tool procurement, spare parts, and third-party vendor services—ensuring strict alignment with company operations and cost-recovery frameworks.
- **Budgetary & Financial Control:** Formulate, administer, and monitor the yearly departmental budget for facility maintenance, forecasting expenditure, and ensuring that operational workflows strictly respect contractual financial limits.
- **Tender & Procurement Oversight:** Act as the primary Technical Evaluator and planner for all tendering, bidding, and quotation activities related to office, engineering, and site maintenance services.
- **Variation Order (VO) Management:** Formulate, evaluate, and present commercial proposals, variation orders, or extensions of service scopes to the clients for formal approval.

Project Management & Site Execution

- **Operational Leadership:** Direct and guide Shift Leaders and technical teams to ensure the flawless execution of day-to-day operations and mechanical & electrical (M&E) systems, maintaining zero operational downtime at clients' facilities.
- **Maintenance Strategy & Audits:** Establish comprehensive maintenance procedures, detail routine inspection schedules, and lead specialized technical audits (condition assessments) for civil, structural, and building engineering installations.
- **Specialist Vendor Coordination:** Supervise, coordinate, and evaluate external contractors and specialized vendors brought in for specialized preventive maintenance or emergency breakdown responses.
- **Workforce Performance Tracking:** Manage general and technical site manpower, structure duty rosters, and monitor staff performance metrics against Key Performance Indicators (KPIs) while enforcing company disciplinary standards.

Client Relations, Compliance & Reporting

- **Executive Technical Reporting:** Prepare and formally present Bi-monthly Reports, technical executive summaries, and open-issue logs during strategic maintenance meetings with the clients' management.
- **Regulatory & Safety Compliance:** Serve as the chief liaison officer with external regulatory bodies and master facility developer security teams to ensure all site operations strictly comply with OSHA and statutory safety standards.
- **Strategic Ad-Hoc Alignment:** Execute high-level administrative directives or emergency ad-hoc tasks as commanded by KDESB's Managing Director or as urgently requested by the clients' team.

EXPERIENCES
2022 - 2024

Lead Engineer
Rizal Hood Jurutera Perunding Sdn Bhd

Engineering design and project deliveries and management.

- Liasing with authority (ie; TNB, SPAN, PBAN, Local Municipal Council)
- To work closely with client, contractor and relevant authority to ensure smooth project deliveries.
- To provide engineering solution & design accordance to project requirement.
- To attend project delivery meetings, and site meetings.
- To coordinate manpower and engineering task.
- To provide training and briefing for supervisor and company personnel.
- Act and Standards Fimiliarization :
  - ✓ **Electricity Supply Application Handbook (v3.1) (ESAH)**
  - ✓ **Suruhanjaya Tenaga (ST) - Guidelines for electrical domestic wiring**
  - ✓ **TNB - Electrical Substation Design Standards Guide (v2.0)**
  - ✓ **SPAN - Malaysian Sewerage Industry Guidelines**
  - ✓ **SPAN - Uniform technical Guidelines Water Reticulation and Plumbing**
  - ✓ **KPKT - Uniform building By-Laws (UBBL) 1984**
  - ✓ **BOMBA - Guide to Fire Protection in Malaysia 2006**
  - ✓ **KPKT - OSC 3.0 Plus Online System**

Achievements & Completed Tasks

2024

- **Perbadanan Kemajuan Negeri Selangor (PKNS) Pembangunan Tasik 2B, Antara Gapi** – To design main infrastructure related to Electrical & Mechanical Engineering in which involve Load Calculations, Street Lighting Design, and miscelious coordination with authority.
- **Perbadanan Kemajuan Negeri Selangor (PKNS) Pembangunan Seksyen 3A, Antara Gapi** – To design main infrastructure related to Electrical Engineering in which involve Load Calculations, Street Lighting Design, and miscelious coordination with authority.

2023

- **UNIVERISTI MALAYSIA PAHANG AL-SULTAN ABDULLAH (UMPSA), Gambang, Pahang** – To execute a total engineering study for electrical, mechanical, structural and civil for the entire development and reassessment
- **MINDEF Muara Tuang, Kuching** – To design 1 unit building and 1 unit shelter for Small Arm and Virtual Training Simulator system. To liase with Sarawak Energy SESCO for a construction and delivery of 1 unit 300kVA 11/0.433kV transformer. To supervise and examine low voltage circuit design inclusive network and audio video application for a specilized application.
- ***PERBADANAN KEMAJUAN NEGERI SELANGOR (PKNS), Antara Gapi, Selangor*** - To design street lighting and routing of LV network through out the residential development
- ***AL SUFFI RESOURCES SDN BHD, Batu Pahat, Johor*** – *To design and development a Mix Development project in which includes Electrical, Mechanical, Structural and Civil work.*

2022

- ***ASASI TEPAT DEVELOPMENT SDN BHD Klang, Selangor*** - To provide engineering solutions and design for deliveries of development of recovery complex for Civil & Structure and Electrical & Mechanical Scope.
- ***PENGASIH Bentong, Pahang*** – To provide engineering solutions and design for deliveries of development of recovery complex for Civil & Structure and Electrical & Mechanical Scope.

2021

- ***CHONG SENG DEVELOPMENT SDN BHD Si Rusa negeri Sembilan*** - To provide engineering solutions and design for deliveries of development of recovery complex for Civil & Structure and Electrical & Mechanical Scope.
- ***LEMBAGA GETAH MALAYSIA (LGM) - Jalan Ampang, Kuala Lumpur*** – To design structural components and electrical system for 11,514mm x 57,280mm LED Advertisement screen complete with 1 unit Low Voltage transformer room.

EXPERIENCES

2014 - Current

Engineering Director

Voltfos Sdn Bhd

Managing, Business Developement , Engineering Design for Lighning Protection System, Provide training technical presentation and seminar.

- To work closely with consultants, subcontractor and end user.
- To build a company structure
- To handle human resource and accounting matters for company.
- To handle cash flow and organization matters.
- To register and manage client.
- To provide engineering solution regards to Protec Power Solution products and services related to Lightning Protection Technologies.

Achievements & Completed Tasks

2020

- Diversifying business model into Goverment sector to provide material arrangement and coordination of UPS and Batteries throught out Peninsular and East Malaysia for 3 consecutive years for Tsunami and Earthquakes detection system under supervision of ***Malaysia Meteorology Department (MET)***.

2018

- Provide training, supply and deliver micelinious Lightning Detector products to Oil and Gas facilities, construction sites, golf cources and even school.
- To provide consulation regards to Lightning Protection design for offshore platforms and assisting maincontractor on producing bill of material for project costing.

2017

- ***PETRONAS Bintulu Intigrated Facilities, Sarawak*** – Rectification work related to lighning protection system, surge protection and grounding system through out the site.
- ***MINDEF Padang Tembak*** - Proposal, design and application of Lightning Protection, grounding and surge protection for security building.

2016

- ***PETRONAS Bintulu Intigrated Facilities, Sarawak*** – Study for lighning protection system, surge protection and grounding system through out the site.

2015

- ***Agensi Angkasa Negara (MOSTI)*** - To deliver, install and commissioning of overall Mechanical and Electrical system of new antenna building for MOSTI inclusive UPS and fire alarm system.
- ***PETRONAS KUMANG Cluster Offshore Facilities, Sarawak*** – Study for lighning protection system, surge protection and grounding system through out the site.
- ***PETRONAS TEMANA Cluster Offshore Facilities, Sarawak*** – Study for lighning protection system, surge protection and grounding system through out the site.
- ***SHELL/PETRONAS Bintulu Integrated Facility, Sarawak*** – Study for lighning protection system, surge protection and grounding system through out the site.

2014

- ***PETRONAS Bintulu Crude Oil Terminal, Sarawak*** – Study for lighning protection system, surge protection and grounding system through out the site.
- ***Majlis Perbandaran Ampang Jaya (MPAJ)*** - Uninterruptable Power Supply servicing and upgrades
- ***The Royal Selangor Golf Club (RSGC)*** - To upgrade electrical system and design and installation of a new lightning protection and grounding upgrades.

EXPERIENCES
2022 - 2024

Technical Advisor and Consultant
Perbadanan Pengurusan D'Casa Bandar Baru (PPDCBB)

In charge in ensuring the recovery plan of a residential properties

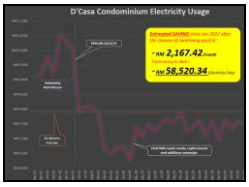

- To construct and **lead a recovery plan** with limited budget for organization.
- To work closely with **contractor and supplier** and being a lead in negotiation.
- To lead and coordinate and negotiate **repayment scheme** and restructuring 15 years accumulated debt.
- To liaise directly with **Bahagian Pesuruhjaya Bangunan (COB)-MPAJ**
- To lead in **Air Selangor migration.**
- Familiarization with Strata Management Act 757, Akta Jalan Parit dan Bangunan 1974, Akta Kesalahan Kecil 1955 (Act 366) and UBBL – uniform building by-laws (UKBS) 1984.
- Others relevant act Akta Kilang dan Jentera, 1967 (Akta 139), Peraturan Kilang dan Jentera (Lif Elektrik untuk Penumpang-penumpang dan Barang-barang) 1970
- To **construct monthly and yearly budget** for recovery plan at the same time maintaining the facilities.
- To execute studies in **increasing efficiency of the installations.**
- To ensure entire stakeholders and committee members are updated and **awareness** are spread.

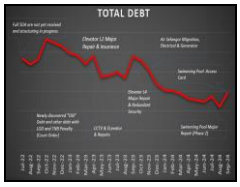

Achievements & Completed Tasks

2022
- To introduced **online payment system** for owners and residence. 100% cashless payment for all payment procedures.
- To reconstruct and sort entire Perbadanan Pengurusan archieve and documentations.
- To plan for recertification and compliance with Suruhanjaya Tenaga for **electrical installations.**
- To plan and arrange rectification and supervising major servicing of **350kVA generator set.**
- To plan and arrange rectification of entire main common area electrical installation with **rectification of capacitor bank** and replacement of **new water water pump system** at the same time refurbishment work for the **entire water pump room.**
- To construct **Standard Operating Procedure** for staff and residence.
- To manage and **coordinate sink hole** issue within the area.
- To design and **upgrade of multipurpose hall** complete with electrical wiring layout and floor manage.

2023
- Successfully assisting facility in migrating from Bulk meter to **Air Selangor** in which further increase the capacity of Perbadanan to expedite upgrades and repair work.
- **Revival of 1 unit of elevator** that has been not in operation for more than 4 years complete with refurbishing elevator room towards compliance to JKKP requirements.
- To supervise, design and coordinate **installation of CCTV system.**
- To supervise and coordinate installation of **RFID autogate system.**
- To redesign and coordinate for **Network infrastructure for future upgrades**.
- To design, coordinate and assist in installation of **Wifi Mesh system** throughout the facility.
- To **redesign lighting layout** for open space common areas and parking areas.
- To lead in refurbishing of **refuse chamber work.**
- To execute **SMATV Headend System** for centralized Satelite antenna for buildings.
- To coordinate negotiation with vendor or **EV Charger station** inside the compound.

2024
- To redesign entire **Swimming Pool system** in which includes in pool lighting, parameter lighting and power system distribution.
- To monitor closely **waterproofing work** which includes PU injection and interlevel waterproofing work.

EXPERIENCES
2011 - 2013

Regional Director
Alltec Asia Sdn Bhd

Business Developement , Engineering Design for Lighning Protection System, Provide training technical presentation and seminar.

- To work closely with foreign companies
- Familiar with Incoterms and shipment matters
- To build a company structure
- To handle human resource and accounting matters for company.
- To handle cash flow and organization matters.

Responsible for oil and gas market for asean countries : ***Malaysia, Indonesia, Singapore, Thailand and Brunei***
Job related to Standard such as

- **IEC 62305 -** Lightning Protection System (Volume 1,2,3,4,5)
- **API RP 545** Lightning Protection of Aboveground Storage Tanks for Flammable or Combustible Liquids.
- **BS 6651:1999** – Code of practice for protection of structures againts lightning.

Speaker for **LASTFIRE MEETING** "Large Atmospheric Storage Tank Fires"

Achievements & Completed Tasks

2013

- ***CHEVRON Balik Papan Terminal, Indonesia*** – Study for lighning protection system, surge protection and grounding system through out the site.
- ***CHEVRON Lawe-Lawe Terminal, Indonesia*** – Study for lighning protection system, surge protection and grounding system through out the site.
- ***CHEVRON, Indonesia*** – Single handedly generate a sales of approximately MYR 750,000.00 for lightning protection products and services
- ***PETRONAS / SAMSUNG / KNM Petrosab Engineering Sdn Bhd*** - To design and supervise installation of Lightning Protection Devices for floating roof tank for SOGT project.
- Numurous numbers of project in which includes project management, supplier chain and relavant services related to Lightning Protection System, Grounding system, Surge Protection System and electrical maintenance.

2012

- ***EXXONMOBIL, Singapore*** - Single handedly generate a sales for lightning protection products and services
- Numurous numbers of project in which includes project management, supplier chain and relavant services related to Lightning Protection System, Grounding system, Surge Protection System and electrical maintenance.
- To carry out sales presentation and technical training for distributors in Indonesia, Philipines, Singapore and Vietnam.

2011

- Numurous numbers of project in which includes project management, supplier chain and relavant services related to Lightning Protection System, Grounding system, Surge Protection System and electrical maintenance.
- To carry out sales presentation and technical training for distributors in ***Indonesia, Philipines, Singapore and Vietnam***.

Application Engineer
Alltec Corporation, NC US

Business Developement , Engineering Design for Lighning Protection System, Provide training and technical presentation 2010

- To execute regional market study for ***South East Asia***.
- To carry out a case study regards to Lightning Protection market for ***Malaysia market*** and its current practices.
- To provide support and marketing presentation and technical support for ***Indonesia, Brunei, Singapore, Thailand & Philipines***.

EXPERIENCES
2008 - 2010

Project Engineer
BPE Engineering and Services Sdn.Bhd.

Project management , Tender filling, Business Development , Reports Writing and Technical Presentation , Report preparation.

- Lightning Protection System survey, installation, design and consultancy. Lighting Standard Survey, Industrial electrical distribution survey, DC Battery, Uninteruptable Power Supply (UPS), Electrical Inspection and Service.
- Job related to Standard such as
  - ✓ **Petronas Technical Standard (PTS)**
  - ✓ **PERATURAN – PERATURAN ELEKTRIK 1994**
  - ✓ **AKTA BEKALAN ELEKTRIK (SYARIKAT PENGGANTI) 1990**
  - ✓ **BRITISH STANDARD (BS 6651:1999)**
  - ✓ **JKKP (AKTA KILANG DAN JENTERA 1989, PENDEDAHAN BUNYI BISING)**
  - ✓ **JAS (ENVIRONMENTAL NOISE LIMITS AND CONTROL)**

Achievements & Completed Tasks

2009

- ***PETRONAS Gas Berhad (PGB)*** – To handle electrical maintenance work for three (3) sites ; KLIA, Subang, Klang on 2+1 year(s) contract in which includes to project management, maintenance work execution and proposal preparation.
- ***SAPURA Ecergy*** - J-Lay tower rejuvination project
- ***Kem Bina Negara (KBN)*** - Lightning Protection System upgrades and Electrical safety and complicance audit.

2008

- To assist and monitor installation the new Main Switch Board (MSB) and electrical components for ***Kem Bina Negara (KBN)***, Maran, Malaysia
- To assist and monitor the installation of the new transformer at ***Permodalan Nasional Berhad (PNB)***, Damansara.
- Electrical maintanance for ***Kuala Lumpur International Airport Berhad (KLIA)*** **facilities.**
- To assist and monitor the project schedule for consultancy service for Gas Leakage Mapping at ***Petronas Gas Berhas (PGB)*** Facilities.
- Electrical survey based on Malaysian Standards and regulation for Biro Tatanegara facilities.
- To assist troubleshooting procedure for DC battery for ***UMNO*** Building
- Electrical, acoustic, safety survey based on Malaysian Standards and regulation for ***FELDA*** facilities.
- Study For ***PETRONAS Miri Crude Oil Terminal (MCOT)*** Lightning Protection System (LPS) And Detail Design For MCOT Tank Earthing System
- Study for ***PETRONAS Bintulu Crude Oil Terminal (BCOT)*** Tank Earthing System
